BACHELOR OF PUBLIC HEALTH in Public Health

About the Program

The Faculty of Public Health focuses on producing health experts equipped with the knowledge and capacity of enhancing health standards in all sectors of the community thereby promoting a higher quality of life.

The course also serves as a pre-med alternative, should you do very well, proving you could make a competent advanced healthcare specialist or possibly a doctor.

Supervisory Body

This degree is under the supervision of the Office of the Higher Education Commission.

What You Will Learn

Our Bachelors of Science in Public Health (Major in Community Health) trains you to efficiently examine communities in order to effectively plan, prepare, and apply solutions to address community health concerns. From identifying environmental hazards to caring for the elderly, the program has been designed to give you crucial insights into the numerous social, psychological, environmental, technological, cultural and political factors that are affecting the health of society.

Courses in the program enlighten you with the fundamentals of measurement and evaluation, theoretical and practical treatment for disease prevention, health promotion, and research methods.

St Theresa's international environment encourages you to expand upon your English language skills which is an advantage for securing job positions in public health agencies anywhere around the world. The program's low student-to-faculty ratio encourages a sense of community that strengthens valuable skills such as teamwork and harmonious cooperation.

The curriculum is divided into three different disciplines, Environmental Studies, Community Health, and Hospital Management.

At the conclusion of the program, you are required to complete an internship where you gain actual work experience in the daily operations of public health officers.

Career Opportunities

- **Public Health Officers** for the prevention of communicable diseases.
- May choose to pursue **further studies** in Master's and Ph.D. levels within Thailand or abroad.
